

Assignment #1: Associate Software Engineer

Create a dev org using developer.salesforce.com/signup create 4-5 validation rules on the account object, and create a connected app so that it can be used as a bridge between the web application and Salesforce. Salesforce is to be used for this.

For the web applications, create a login button to connect/log in to salesforce org. Get all the validation rules from the org using metadata or tooling API, and should be able to activate and deactivate the validation rules from there directly in the org.

- Sign up to Salesforce Developer ORg developer.salesforce.com/signup.
- Create some validation rules for the Account. Connected APP. Will act as a bridge to pass data between Salesforce and the web application (You can learn metadata/tooling API)
- Learn OAuth 2.0 for a better understanding of authorization

Salesforce <https://sfswitch.herokuapp.com/> (for sample existing application)

Web App: Use React/Angular or anything of your choice

1. A login Button to log in to Salesforce.
2. Button to get all the validation rules.
3. Show all the validation rules list along with the state (active or inactive)
4. Button to enable or disable all or just to toggle a single validation rule.
5. Button to deploy so the changes are made in Salesforce as well.
6. Deploy this application on any online server Salesforce.com [Switch sfswitch.herokuapp.com](https://sfswitch.herokuapp.com/)

Assignment Submission Guidelines

1. Please be advised that only candidates who have completed their studies are eligible to attempt the assignment. If you are currently pursuing your education, we kindly request that you do not submit the assignment, as only those who have graduated will be considered.

2. All code assignments must be deployed on a local server, and the repository link must be shared. Assignments submitted in any other format, such as Word, PDF, or image files, will not be considered for review.

3. Only candidates who submit fully functioning solutions for all the listed assignments will be eligible to proceed to the next level.

4. The deadline for submission is 10 working days from the assignment date. Submissions

received after the deadline will not be accepted or reviewed.

5. The application deployed link, along with an updated resume, should be sent to the email address: careers@cloudvandana.com.
